(Shown with optional side door)

Work in a metropolitan area with underground parking? Look no further the SpaceKap COMPAK is the ideal solution for you. With a cab-level design, the streamlined unit also gives you excellent accessibility. With full-length side doors and an optional single or dual sliding tray system, no more bending over to reach your gear.

The SpaceKap WILD is the perfect model for anyone looking for a unit with similar characteristics as a cargo van. With an interior height of 53", it is tall enough to use from the inside and has the added advantage of having full-length side access doors that also allow access to the outside. ing over to reach your gear.

The DIABLO offers an amazing interior height of 75" and a very spacious interior volume (372 ft3). Skylight windows add natural lighting and LED light bars help out at night, providing you with the most versatile mobile workstation you could ever imagine.
